

## Saline Memorial Acute Rehabilitation Sharing Our Outcomes from 2021

We are extremely proud of the number of our patients who have increased their independence in our inpatient rehabilitation program. Changes in independence are measured using the IRF-PAI Functional Quality Indicators which assess how well patients can manage daily tasks such as dressing, transfers and walking.

Patients functional activities are measured when they arrive (admission) and throughout their stay in inpatient rehabilitation. By the time patients leave the rehab program (discharge), we expect an increase in Functional Gain in the range of 40-50 points. Our overall target is 44.76. Below is information on the types of patients we saw in 2021, their length of stay in the program and their functional gains. Of the 342 patients served here in 2021, the overall functional gain attained was 49.2, which is at the expected overall target.

 <b>Diagnosis</b>	<b>Number of Those we Served</b>	<b>Average Length of Stay (days)</b>	<b>Discharge Rate to Home or Community Setting</b>	<b>Discharge Rate to Skilled Nursing</b>	<b>Unplanned Transfers to Acute Care</b>	<b>Functional Improvement Gain</b>
<b>Cardiac</b>	14	8.9	92.9%	7.1%	0%	51.7
<b>Multiple Trauma</b>	15	11.3	100%	0%	0%	55.2
<b>Neurological</b>	45	12.9	73.8%	9.5%	16.7%	55.9
<b>Brain Injury</b>	42	8.95	88.6%	8.55%	2.85%	46.3
<b>Orthopedics</b>	115	10.2	85.2%	11.7%	3.1%	53.5
<b>Spinal Cord Injury</b>	5	15.9	100%	0%	0%	57.4
<b>Stroke</b>	35	13.3	71.4%	22.9%	5.7%	43.2
<b>Amputation – Lower Extremity</b>	8	10.3	87.5%	12.5%	0%	34.0
<b>General Rehabilitation</b>	63	9.8	79.3%	12.1%	8.6%	41.4
<b>ALL PATIENTS ALL DIAGNOSES</b>	<b>342</b>	<b>11.0</b>	<b>81.3%</b>	<b>11.1%</b>	<b>6.1%</b>	<b>49.2</b>
 	<b>Total Patients Served</b>	<b>Average Age</b>	<b>% Male</b>	<b>% Female</b>	<b>Average Number of Treatment Hours/Day</b>	<b>Patient Satisfaction with Services</b>
<b>All Patients &amp; All Diagnoses</b>	<b>342</b>	<b>74.3</b>	<b>40.4%</b>	<b>59.6%</b>	<b>2.34 hr/day</b>	<b>91.94%</b>

**Patient Satisfaction:**

Patients who responded to our survey consistently rated our services at 91.94% for overall Patient Satisfaction. Our survey response rate is 30%.

Our greatest achievements are in preparing our patients to return home or to a community setting, 81.3% achieved this successfully!

**Saline Memorial Rehabilitation Individualized Information & Disclosure**

**YOUR CARE:**

Your program will include individualized frequency and intervention by the following disciplines. An approximate plan will include:

- **PT: \_\_\_minutes per day for strengthening and mobility;**
- **OT: \_\_\_minutes per day to work on self care skills: bathing, dressing, grooming, & eating**
- **ST: \_\_\_minutes per day to help with difficulties in thought processes, swallowing & speaking**

A combination of these services will be provided at least 3 hours per day, usually in the morning and afternoon. Lunch and rest period are at mid-day. Based on your needs, you may receive additional therapy on the weekends. You will be seen by a physician specializing in Rehabilitation Medicine. The hospital has 24 hour physician on call coverage and consulting specialists are available if needed. Rehabilitation Nursing will also be provided around the clock.

Your estimated length of stay at Saline Memorial Rehabilitation Unit will be \_\_\_ days.

**Cultural Needs**

The Saline Memorial Rehab team embraces the opportunities of multi-culturalism, diversity and inclusion in all aspects. Our team takes into consideration culture, age, gender, sexual orientation, spiritual beliefs, socioeconomic status, language, and more when developing a plan. Please notify us of any special accommodations you may need and we will do our best to accommodate.

### **Alternative Resources:**

Your discharge from rehab will be facilitated by a case manager who will help identify and arrange for any individualized services that may be required upon discharge. These may include:

- Durable medical equipment (DME), prosthetics and orthotics
- Skilled nursing facilities where therapy at a less intense level is offered with 24 hour nursing care.
- Home health services, outpatient services, caregiver services
- Counseling for depression, adaptation to disability, substance use, and other needs
- Support groups / peer support

### **What you will need to bring:**

- Loose fitting pants/shorts (sweat suits or gym shorts are often worn) and shirt/blouses
- Tennis shoes or walking shoes (non-skid soles)
- Socks, underwear, and toiletries
- Coat or jacket (depending on time of year) for outdoor training or enjoying the courtyard
- Healthcare directive if one has been established.
- Personal health Record if one has been established.

### **Visiting Hours:**

Since a large portion of the day is spent in therapy, visiting hours are tailored to allow for uninterrupted sessions with limited distractions. General visiting hours are 4 p.m. to 8:00 p.m. Monday through Saturday, and all day on Sundays and major holidays. A primary caregiver may stay with the patient around the clock and will observe and/or be involved in therapy on scheduled days. There are no age restrictions for visitors.

***Please note that during high levels of COVID there may be other restrictions regarding visitation.***

**Your hospitalization costs may be covered by:**

**Medicare Part A:** Pays for the cost of inpatient rehabilitation provided you meet criteria at admission and during your stay. Your out-of-pocket expenses include a deductible for inpatient hospital stays and daily coinsurance for continuous inpatient stays lasting longer than (60) days, (61<sup>st</sup> through 150<sup>th</sup> day). For more specific coverage, visit Medicare's website at [www.CMS.hhs.gov](http://www.CMS.hhs.gov) or ask to speak with your case manager. Your rehabilitation stay at this facility will be covered under the hospital level benefit. The Medical Director will make the decision whether you meet admission criteria, but it is always subject to review from Medicare.

Currently you have \_\_\_ Medicare days at 100%, \_\_\_ days at 80% and \_\_\_ lifetime days available.

**Medicaid:** Does not cover acute rehabilitation services at our facility. Please contact your case manager or the Office of Medicaid Services for a list of facilities covered by Medicaid.

**Private Insurance/ Indemnity/ Medicare Supplement/ HMO/PPO/Managed Medicaid/Worker's Compensation / etc.:** As a courtesy to you, we will usually call a representative from your insurance plan and try to determine whether the services you are seeking will be covered. Benefits will be verified prior to admission and a designated staff member will obtain pre-authorization if required. You will need to inquire about benefits for inpatient rehabilitation at a hospital level of care. Throughout your stay, as required, your case manager will work with your insurance to obtain continued authorization. If requested, a financial counselor is available to assist you and your family in understanding your benefits, co-payments, and responsibilities before or after admission

Insurance: \_\_\_\_\_ Phone Number: \_\_\_\_\_

Verification has been obtained, and you have \_\_\_\_\_ authorized days. Co-pay information is as follows: \_\_\_\_\_.

This is not a guarantee of payment or of the coverage your plan will provide. We make every effort to obtain accurate information, but you should contact your provider representative to personally verify your coverage.

**The Saline Memorial Rehabilitation Unit and Hospital Information and Disclosure document has been provided to you for general informational purposes.**

**Signature:** \_\_\_\_\_ **Date:** \_\_\_\_\_

## **Inpatient Rehabilitation Program at Saline Memorial Hospital Program Information for 2022**

Welcome to Saline Memorial Acute Rehab. Our 17-bed acute inpatient rehabilitation unit is designed to meet your medical needs through expert rehabilitation care. With the help of our rehabilitation team and the support of your family and other loved ones, you will develop new skills and re-learn previous skills that were affected by illness or injury.

We will work closely with you and your family during your stay here with the goal of sending you home or to the most appropriate placement. To help you recover as fully as possible, it is important for you and your family to understand our rehabilitation program and your treatment.

This guide explains our services and provides information on the types of patients we serve. It also includes details of your individual treatment and payment information that will help you understand what to expect while you are in our rehabilitation program and when you are ready to go home. Your feedback is one of the keys to our success and your recovery. Please share with us how we can make your rehabilitation stay as meaningful and rewarding as possible.

### **MISSION Statement:**

Making our communities healthier

The acute rehab unit is dedicated exclusively to treating individuals who have experienced a disabling injury or illness. It is our mission to help each of our patients attain their personal goals, increase their confidence, improve their quality of life, restore their hope for the future, and reach their fullest potential.

### **Our COMMITMENT to You:**

It is the policy of the Rehab Unit that all team members will act in a manner consistent with the mission, philosophy and operating policies of our program.

In accordance with these principles and policies, team members will:

- Show respect for the dignity of the individual whether patient, family member, visitor, co-worker, client or any other person
- Provide the highest quality clinical and customer related services
- Demonstrate fairness and honesty in all interactions with the public
- Adhere to their professional codes and practice guidelines
- Provide an accurate portrayal of the services and outcomes of the program
- Be ethical in all marketing and public relations activities

### **Referral Sources:**

We receive referrals within the geographic area of central Arkansas from the surrounding acute hospitals, long term acute care hospitals (LTACH), skilled nursing facilities, home health agencies, outpatient centers, physicians as well as self referrals.

### **Methods Used To Assess And Meet Patient Needs:**

We perform a pre-admission screening prior to admission to assess your current status and your goals when you leave our program. It is important to understand each patient's medical, physical, and mental condition, as well as any restrictions (social or cultural), to develop the best treatment plan.

A patient's psychological status is also considered when determining whether he or she could benefit from admission. The rehabilitation Medical Director on our unit will review the pre-admission assessment in order to make a decision to approve or deny the referral prior to admission and the decision will be communicated to the referral source, patient and family/support system. If the referral is determined to be ineligible, recommendations will be made for alternative services.

### **Conditions Treated:**

The rehabilitation program serves patients with a variety of medical, physical, and functional needs. Some of the conditions treated in the program include:

- Stroke
- Spinal Cord Injury (traumatic & non-traumatic; level and completeness determined on case by case basis)
- Amputation
- Brain Injury
- Guillain-Barre
- Hip Fractures
- Joint Replacements
- Multiple Trauma
- Cardiac or Pulmonary Disorders
- Myopathy
- Progressive or Degenerative Neurological Disorders:
  - Multiple Sclerosis
  - Muscular Dystrophy
  - Parkinson's Disease

### **Admission and Continued Stay Criteria:**

- Patient must be medically stable
- Patient must be able to tolerate an intensive rehabilitation therapy program consisting of three hours of therapy per day at least five days per week or consist of at least 15 hours of intensive rehabilitation therapy within a seven consecutive day period, beginning with the date of admission
- Nursing care must be required 24 hours a day
- Patient must require two or more therapies, one of which will be physical or occupational therapy, as well as a coordinated interdisciplinary approach to his or her rehabilitation
- Patient must have experienced a functional decline
- Patient must have potential for improvement
- Patient must be cooperative and motivated
- Patient must require supervision by a rehabilitation physician to assess the patient both medically and functionally and to change the course of treatment if necessary.
- Patient must have a pay source or an arrangement with our financial department prior to admission

### **Discharge and Transition Criteria:**

Our team works with you, the patient, and your family to ensure the most appropriate placement following discharge from the Acute Rehabilitation Unit. When the patient's medical condition allows, the patient and family will be notified within the first week of the pending discharge date by the Case Manager. Discharge from the program shall be considered when one or more of the following criteria occur:

- A patient has reached his/her rehabilitation potential and no longer warrants the intensity of therapy services
- A patient makes no progress in any area of therapy in more than one week
- A patient is medically unstable requiring more intensive medical intervention
- A patient is behaviorally unable to cooperate with the demands of the program or is jeopardizing his/her own safety or that of other patients and or staff
- A patient refuses to participate in the program for 72 hours, despite being medically stable, and there is no evidence of progress.

### **Non-Voluntary Discharge:**

- If you are unable to complete your rehabilitation program because of the intensity of the services, which includes a minimum of three hours of combined therapy at least five days per week, our case manager will assist in finding placement in a less intensive setting to continue services.

**Services Provided:** (All services are provided directly unless noted to be by contract or referral)

- Rehabilitation Medicine
- Medical Consults (by referral if necessary)
- Rehabilitation Nursing
- Physical Therapy
- Occupational Therapy
- Speech Language Pathology
- Activity Programs
- Case Management
- Psychology or Neuropsychology
- Orthotics / Prosthetics
- Visual Assessment
- Respiratory Services
- Dietary Services
- Renal Dialysis(contract)
- Wound Care
- Chaplaincy
- Home Evaluations

**Medical, diagnostic, laboratory, and pharmacy services** are also available here at Saline Memorial Hospital. The response time is specific to each of these services. It is the expectation of this unit, however, that the vast majority of orders or consultations will receive some level of response within 24 hours of receipt. This doesn't include critical orders, which receive prompt attention. That initial response will then be conveyed to the appropriate clinician(s) as soon as possible.

**OUR SERVICES**

Comprehensive inpatient rehabilitation services are provided to adult patients with neurological and other medical conditions who have experienced a loss of function in activities of daily living, mobility, cognition, or communication. This program serves persons 18 years and older and is open to people of all cultures and from all payer sources. Our patients have an illness or injury that requires an ongoing hospital stay, but are stable enough to participate in therapy.

Persons served will receive 24 hour rehabilitation nursing and a minimum of three hours a day of therapy a day, no less than five out of seven days in the week. Your therapy program, including the frequency, intensity and length of stay, will be designed according to your needs after you have been fully evaluated. Hours for therapy services are normally provided from 7:30 am to 4:30 pm. Our unit’s tracking indicates our patients receive, on average, three to four hours of therapy per day.

When you complete your rehabilitation program, the team will work with you and your family to help determine if it is safe for you to return home. If you are unable to return home after discharge, the team will assist you and your family in making other arrangements.

**Restrictions of our Program:**

Our program does not accommodate anyone under the age of 18, ventilator-dependent patients, patients who are non-responsive or unable to follow commands, those who have severe dementia, patients who wander excessively, are combative or have behavioral dysfunctions. We serve patients with spinal cord injuries on a case by case basis, whether complete or incomplete, traumatic or non-traumatic. If our services are unable to meet the needs of a patient referred, recommendations for alternate services will be provided.

### **Insurance and Payment Sources:**

Medicare and your supplemental secondary insurance (if you have one) will cover most services provided during your inpatient rehabilitation stay, as long as you meet the admission and continued stay criteria. The Medical Director will evaluate whether you meet these criteria, but this is always subject to Medicare review. If you have other types of insurance, your benefits will be verified before admission. If there are limitations identified in your coverage, your case manager will discuss these with you, as well as alternative resources to help meet your needs.

Out-of-pocket expenses that you may incur depend upon your specific insurance coverage, co-payments, benefits and eligibility. Some patients may need to purchase durable medical equipment (wheelchair, walker, commode, etc.) as this equipment may not be covered by a particular insurance plan.

### **Assistance with Financial Responsibility:**

A financial counselor is available to assist you and your family in understanding your benefits, co-payments, and responsibilities before or after admission. If you are paying cash or need assistance or information, please contact a patient services representative in the business office at 501-776-6069.

### **General Information:**

- **Discharge against Medical Advice (AMA):** Competent patients, and those with legal guardians or active durable power of attorney for health care, have the right to leave the hospital against medical advice. In that event, the physician/staff will inform the patient of the potential risks. The patient, guardian or durable power of attorney for healthcare will then sign a release of liability for leaving against medical advice.
- **Security of Personal Possessions:** Patients are encouraged to leave valuables at home. The hospital cannot be responsible for lost or stolen items. If such items are brought with the patient, he/she is encouraged to give them to family/friends to take home or have nursing staff place them in the safe located within the hospital.
- **Patient Rights:** The persons served, families, friends, caregivers and community have the right to respectful, considerate care from all rehabilitation members they interact with at all times and under all circumstances. All individuals served will have freedom

from abuse, financial exploitation, retaliation, humiliation, and neglect. We do not discriminate based on race, ethnicity, national origin (including language), spiritual beliefs, gender, age, current mental or physical disability, sexual orientation, or socioeconomic status. A copy of Patient Rights is available, as well as posted for viewing on the unit.

**Rights with Regard to Advanced Directives:** It is the policy of Saline Memorial Hospital to respect and encourage patient self-determination. Patients shall therefore be offered the opportunity and wherewithal to formulate Advance Directives. Neither admission to the hospital nor treatment shall be contingent upon the formulation or existence of Advance Directives.

Advance Directives (written or verbal) shall be clearly documented in the medical record, and hospital staff shall honor them within the limits of the law.

Saline Memorial Hospital shall provide educational opportunities concerning Advance Directives to its patients, family members, staff and the community.
